# THE LAUNCH OPPORTUNITY

## Positioning Lubri-Soy in a Performance-Driven Market

### COMMUNICATION CHALLENGE

Lubri-Soy enters a performance-critical industry where product decisions are driven by risk mitigation, not innovation.

In this context, bio-based solutions are often perceived as less reliable, creating immediate resistance before performance is even evaluated.

### OPPORTUNITY

The opportunity is not just to introduce a new lubricant, but to redefine a core industry assumption.

If Lubri-Soy can prove that sustainability does not compromise performance, it can shift how value is understood in this category.

### COMMUNICATION OBJECTIVE

Build confidence by positioning Lubri-Soy as a high-performance solution first, and a sustainable alternative second.

The goal is to reduce perceived risk and enable product consideration.

### STRATEGIC APPROACH

The campaign focuses on moving the audience from skepticism to confidence through a structured journey:

- Tease to create curiosity
- Reveal to introduce the product
- Educate to demonstrate performance
- Convert to drive action

**IN THIS CATEGORY, ADOPTION IS DRIVEN BY CONFIDENCE, NOT NOVELTY.**

# UNDERSTANDING THE DECISION-MAKER

## Who We Need to Influence and What Drives Their Decisions

### PRIMARY AUDIENCE

Lubri-Soy targets technical and commercial stakeholders involved in drilling fluid selection and product evaluation, including drilling engineers, completion engineers, fluid specialists, and oil and gas operators.

### DECISION ROLES

This audience includes multiple stakeholders with distinct roles in the decision process:

- Technical evaluators (drilling and completion engineers) assess whether the product performs reliably under field conditions
- Operational influencers (service companies and fluid specialists) recommend solutions based on compatibility, performance, and ease of use
- Commercial decision-makers (operations and procurement) evaluate cost efficiency, loading performance, and overall business value

Communication must address both technical confidence and commercial logic

### DECISION CONTEXT

Decisions are made in high-risk environments where failure can lead to downtime, cost overruns, and operational disruption.
Adoption is driven by proven performance, not novelty or sustainability alone.

### KEY BARRIER TO ADOPTION

The primary barrier is not awareness, but skepticism.
Bio-based solutions are often perceived as less reliable, less stable, and less effective under extreme conditions, creating resistance before evaluation begins.

### CORE INSIGHT

This audience does not adopt innovation unless it reduces risk.
They are open to new solutions only when performance is proven and reliability is unquestionable.
Adoption is driven by confidence, not novelty.

### COMMUNICATION IMPLICATION

The campaign must reduce perceived risk, not just generate awareness.
Lubri-Soy should be positioned as a high-performance solution first, with sustainability as an added advantage.
Credibility must be established before differentiation becomes persuasive.

# AUDIENCE PROFILE

## Understanding the Technical Decision-Maker

### WHO THEY ARE

A drilling or completion engineer responsible for selecting fluid solutions that directly impact operational performance, efficiency, and cost.

### THEIR REALITY

They operate in high-risk, high-pressure environments where performance failure can lead to downtime, cost overruns, and operational disruption.
Every decision carries responsibility, and failure is not an option.

### WHAT DRIVES THEIR DECISIONS

They prioritize solutions that are:

- Proven in real operating conditions
- Reliable and consistent under pressure
- Cost-efficient at scale
- Easy to integrate into existing systems

They are cautious with new products and actively avoid unnecessary risk.

### HOW THEY ENGAGE

They rely on:

- technical documentation
- supplier expertise
- industry platforms such as LinkedIn
- peer and field-based recommendations

### WHERE LUBRI-SOY FITS

Lubri-Soy aligns with their needs as a solution that delivers strong performance and efficiency, while introducing sustainability without adding complexity or risk.

### CORE INSIGHT

This audience is open to better solutions, but only when innovation is backed by proven performance.
Adoption depends on confidence, not novelty.

## IN THEIR WORDS

**I need something that performs consistently every time. If it introduces risk, I won’t consider it.**

# FROM INSIGHT TO POSITIONING

Defining the Role of Lubri-Soy in the Market

## KEY INSIGHT

In high-risk operational environments, decision-makers avoid change unless performance is proven.
Sustainability is not a driver of adoption unless it comes without added risk.

## POSITIONING

Lubri-Soy is a high-performance drilling lubricant that delivers reliable results under extreme conditions, while providing a bio-based alternative that does not compromise operational performance or increase risk.

## THE BIG IDEA

**No Trade-Off Performance**

## WHAT IT MEANS

Lubri-Soy redefines industry expectations by proving that sustainability and performance are not mutually exclusive.
It enables operators to adopt a more sustainable solution without sacrificing reliability, efficiency, or operational confidence.

# CAMPAIGN OBJECTIVE & STRATEGIC APPROACH

Driving Awareness, Confidence, and B2B Engagement

## CAMPAIGN OBJECTIVE (SMART)

Increase **brand awareness** and generate qualified B2B inquiries for Lubri-Soy **by 25%** within **one month** of launch, through a targeted, educational, and performance-driven social-first campaign aimed at oil and gas professionals.

## COMMUNICATION JOURNEY

Content is structured across a four-stage journey:

- Tease → create curiosity and initial awareness
- Reveal → introduce Lubri-Soy and its core value
- Educate → explain performance, application, and benefits
- Convert → reinforce proof and drive action

## STRATEGIC APPROACH

The campaign positions Lubri-Soy as a high-performance drilling solution that also delivers sustainability, addressing the industry perception that these benefits require trade-offs.

The strategy is executed through digital and social channels, supported by website and sales touchpoints, to ensure a consistent and credible communication journey.

Rather than directly promoting the product, the campaign focuses on:

- Educating the audience through clear and technical content
- Building credibility with performance-driven messaging
- Reducing perceived risk by reinforcing reliability
- Leveraging industry experts and technical voices to reinforce credibility
- Driving engagement and inquiries through structured calls to action

# MESSAGING FRAMEWORK

Translating Strategy into Communication

## CORE MESSAGE

No Trade-Off Performance

## SUPPORTING MESSAGE

Precision Performance. Naturally Delivered.

## ROLE OF THE MESSAGE

This messaging framework directly addresses the category's core barrier:

**the perception that sustainable solutions compromise performance.**
**By reinforcing performance first, Lubri-Soy is positioned as a credible, low-risk solution, with sustainability as an added advantage.**

## MESSAGE PILLARS

**Performance (Primary Driver)**

High lubricity under extreme pressure
- Stability in complex environments
- Proven performance in real conditions

Role: Establish credibility and technical trusttrust

**Operational Efficiency (Business Value)**
- Cost-effective at low loading levels
- Reduced product consumption
- Improved operational efficiency

Role: Justify adoption from a commercial perspective

**Sustainability (Differentiator)**
- High bio-based formulation (e.g., up to 93% bio-based carbon)
- Biodegradable and environmentally aligned chemistry
- Supports ESG and regulatory goals

Role: Add strategic value beyond performance without introducing risk

**Proof & Validation (Risk Reduction)**
- Real-use scenarios and applications
- Comparisons with traditional lubricants
- Clear explanation of how the product works

Role: Reduce skepticism and reinforce confidence

# CREATIVE STRATEGY

## How the Idea Comes to Life

### CREATIVE APPROACH

The campaign translates a highly technical product into clear, credible, and decision-oriented communication tailored to a performance-driven B2B audience.

Rather than simplifying the message excessively, the approach ensures technical accuracy while making information accessible and actionable.

**The focus is to build confidence, reduce perceived risk, and support informed decision-making.**

### CREATIVE DIRECTION

The campaign is built on three key principles:

- Technical clarity → to establish credibility and trust in performance
- Visual simplification → to make complex information easy to understand
- Confidence-driven communication → to reduce skepticism and reinforce reliability

### TONE & STYLE

- Professional and authoritative
- Clear, structured, and informative
- Performance-led, not promotional
- Evidence-driven to support credibility

### VISUAL LANGUAGE

- Industrial, minimal, and high-precision aesthetic
- Strong hierarchy to guide technical understanding
- Use of diagrams, product visuals, and real-use scenarios
- Controlled use of green tones to signal sustainability **as a secondary cue**

## CONSISTENCY

**All communication reinforces a single strategic message:**

**No Trade-Off Performance**

**Precision Performance. Naturally Delivered.**

Ensuring a unified, credible experience across all touchpoints, from awareness to conversion.

# CONTENT PLAN

Structured Campaign Execution

## W1

### TEASE
(AWARENESS)

Objective: Build curiosity and initial awareness
Content Type:
- Short teaser videos
- Close-up visuals
- Minimal messaging

**Focus: Create curiosity by highlighting the tension between performance and sustainability without introducing the product**

## W2

### REVEAL
(AWARENESS → INTEREST)

Objective: Introduce Lubri-Soy and its core value
Content Type:
- Product introduction video
- Carousel posts highlighting key benefits

**Focus: Introduce Lubri-Soy as a solution that challenges the trade-off assumption**

## W3

### EDUCATE
(INTEREST → CONSIDERATION)

Objective: Build understanding and credibility
Content Type:
- Explainer diagrams
- “How it works” content
- Sustainability clarification

**Focus: Reduce perceived risk through technical clarity, real-world relevance, and performance explanation**

## W4

### PROVE & CONVERT
(CONSIDERATION → ACTION)

Objective: Reinforce confidence and drive inquiries
Content Type:
Product comparison
Performance validation content
Strong call-to-action posts

**Focus: Reinforce credibility and justify adoption through proof, comparison, and business value**

## STRATEGIC ROLE

This phased approach ensures:
- Awareness is built before persuasion
- Credibility is established before sustainability is introduced
- Perceived risk is reduced before decision-making
- The audience moves from skepticism → confidence → action

## CONTENT VOLUME

8 total posts
2 posts per week
Mix of video, static, and carousel formats

**This plan translates the communication journey into channel-specific execution.**

# MEDIA & CONTENT PLAN (1-MONTH EXECUTION)

From Awareness to Conversion

## CAMPAIGN STRUCTURE

1 Month | 8 Posts | 2 per week

**Journey:**

Tease → Reveal → Educate → Prove & Convert

**Goal:** Skepticism → Confidence → Adoption

# WEEK 1

## TEASE (AWARENESS)

Goal: Objective: Build curiosity by introducing the performance vs sustainability trade-off

### Post 1:  Video (10–15 sec)  (Teaser)

**Visual Idea:**
Close-up of drilling equipment in motion
High-pressure environment, motion blur, fluid movement
Industrial textures, cinematic lighting
No product shown

**Hook (On Screen):**
**Performance shouldn't be a compromise.**

**Caption:**
In high-performance drilling environments, reliability isn't optional, it's critical.
Yet many solutions force a trade-off between performance and sustainability.
What if that trade-off didn't exist?
Something is coming.

#OilAndGas #DrillingPerformance #Engineering #Innovation

### Post 2: Static / Video (RISK ANGLE)

**Visual Idea:**
Pressure gauges, drilling close-up, intense environment Dark blue + controlled green accents

**Hook (On Screen):**
**Every decision carries risk.**

**Caption:**
In drilling operations, even small decisions have major consequences.
Performance failures don't just impact efficiency,  they affect cost, downtime, and stability.
That's why new solutions aren't trusted easily. They have to prove themselves.

#OilAndGas #DrillingPerformance #Engineering #Innovation

**Voiceover (optional):** "In this industry, risk isn't theoretical, it's operational."
**CTA: No CTA → curiosity only**

# WEEK 2

## REVEAL (AWARENESS → INTEREST)

Goal:  Introduce Lubri-Soy as a high-performance solution that challenges the trade-off between performance and sustainability

### Post 3:  Product Introduction (Soft Reveal)

**Visual Idea:**
Clean industrial environment with drilling equipment in focus
Introduce product subtly (barrel in controlled setting)
Controlled lighting with blue base and green accents
Subtle digital overlay to reinforce precision and formulation

**Hook (On Screen):**
**Not all lubricants are created equal.**

**Caption:**
In high-pressure drilling environments, performance is everything.But not all solutions are built to perform under real conditions.
Lubri-Soy is designed to deliver reliable performance where it matters most.
No trade-offs. Just results.

#OilAndGas #DrillingPerformance #Engineering #Innovation

**Voiceover (optional): “Performance isn’t claimed. It’s proven.”**
**CTA: Stay tuned to see how performance is being redefined**

### Post 4: Value Framing (Differentiation)

**Visual Idea:**
Split-screen concept:
Left = traditional lubricant (dark, heavy, inefficient feel)
Right = cleaner, smoother, controlled performance environment
Subtle contrast, not exaggerated

**Hook (On Screen):**
**Why compromise?**

**Caption:**
For years, operators have had to choose between performance and sustainability.
One delivers strength.
The other delivers environmental value.
Lubri-Soy changes that equation.
A solution built to deliver both, without compromise.
#OilAndGas #DrillingPerformance #Engineering #Innovation

**Voiceover (optional):“Why choose between performance and sustainability?”**
**CTA: See how Lubri-Soy is changing the standard.**

# WEEK 3

## EDUCATE (INTEREST → CONSIDERATION)

Goal: Build understanding and credibility by demonstrating how Lubri-Soy performs in real conditions

### Post 5:  How It Works (Mechanism)

**Visual Idea:**
Close-up of drill pipe or metal surface
Lubricant visibly interacting with the surface (smooth flow / reduced friction effect)
Simple diagram-style overlay (lines, arrows, motion indicators)
Clean, minimal, technical

**Hook (On Screen):**
**Engineered for performance under pressure.**

**Caption:**
In drilling operations, performance depends on how effectively friction is controlled under extreme conditions.
Lubri-Soy is formulated to deliver high lubricity, helping reduce torque, drag, and mechanical stress during operations.
Designed to perform consistently, even in complex environments.

#OilAndGas #DrillingPerformance #Engineering

**Voiceover (optional): “Performance starts at the point of contact.”**
**CTA: Learn how Lubri-Soy works in real drilling conditions.**

### Post 6: Sustainability (Clarification)

**Visual Idea:**
Blend of industrial + natural cues
Example:

- Drill pipe with subtle green fluid accents
- Clean environment (not overly “eco”)
- Minimal, controlled use of green

**Hook (On Screen):**
**Sustainability should not come at the cost of performance.**

**Caption:**
Sustainable solutions are often seen as less reliable in high-performance environments.
Lubri-Soy is different.
With a high bio-based formulation, it delivers environmental benefits while maintaining the performance standards required in drilling operations.
No compromise. Just better balance.
#OilAndGas #Sustainability #Engineering

**Voiceover (optional): “Performance and sustainability, engineered together.”**
**CTA: Discover a more sustainable approach to drilling performance.**

# WEEK 4

# CONVERT (CONSIDERATION → ACTION)

Goal: Reinforce credibility and drive action by showing proof, reliability, and real-world value

## Post 7: Proof (Performance Validation)

**Visual Idea:**
Real drilling environment or close-up operational shot
Could include:

- Performance metrics overlay (minimal)
- Clean industrial shot (not over-designed)
- Subtle data/number cues (not too marketing-heavy)

**Hook (On Screen):**
**Performance you can rely on.**

**Caption:**
In drilling operations, consistency matters as much as performance.
Lubri-Soy is designed to deliver stable, reliable results across demanding conditions, helping operators maintain efficiency and reduce operational risk.
A solution built not just for performance, but for confidence in every operation.
#OilAndGas #DrillingPerformance #Engineering

**Voiceover (optional): "Reliable performance, where it matters most."**
**See how Lubri-Soy performs in real applications.**

## Post 8: Conversion (Call to Action)

**Visual Idea:**
Visual Idea:
Clean, strong product-focused visual
Can include:

- Barrel in real industrial setting
- Or product + environment
- Minimal, premium, confident

**Hook (On Screen):**
**No compromise. Just performance.**

**Caption:**
Lubri-Soy delivers the performance required in drilling operations, without sacrificing environmental responsibility.
A high-performance, bio-based solution designed for modern operational demands.
Ready to experience the difference?
#OilAndGas #DrillingPerformance #Sustainability

**Voiceover (optional): "Performance without compromise."**
**CTA: Contact us to learn more or request product information.**

# CAMPAIGN RATIONALE

## Strategic Foundation Behind the Campaign

The campaign is designed to align with how decision-makers in the drilling industry evaluate new solutions.
Adoption depends on confidence built over time, not immediate claims.
The structured journey from awareness to conversion allows the audience to:

- Understand the problem before seeing the solution
- Evaluate performance through clear and relevant content
- Build trust gradually through consistent messaging

By leading with performance and introducing sustainability as a supporting benefit, the campaign ensures Lubri-Soy is positioned as a credible and reliable choice within a risk-sensitive environment.

# WHY THIS CAMPAIGN WILL WORK

## Driving Confidence in a Risk-Averse Industry

1

**Built for a performance-driven, risk-sensitive audience**

The campaign acknowledges that decision-makers in drilling operations prioritize reliability over novelty. By leading with performance and gradually introducing sustainability, it aligns with how this audience evaluates new solutions.

2

**Reduces skepticism through structured communication**

The phased approach moves from curiosity to proof, allowing the audience to build confidence over time rather than forcing immediate adoption.

3

**Balances technical credibility with clarity**

The campaign acknowledges that decision-makers in drilling operations prioritize reliability over novelty. By leading with performance and gradually introducing sustainability, it aligns with how this audience evaluates new solutions.

4

**Consistent visual and messaging system**

The integration of industrial environments with subtle digital and green accents reinforces both engineering precision and bio-based innovation across all touchpoints.

CHANNEL STRATEGY

# Reaching the Audience Through Relevant Industry Touchpoints

## PRIMARY CHANNELS

### LINKEDIN (PRIMARY PLATFORM)

The core platform for reaching oil and gas professionals and technical decision-makers.

- Share educational and performance-driven content
- Build awareness and engagement
- Support B2B communication and visibility

### YOUTUBE / VIDEO PLATFORMS

Used to deliver deeper product understanding through visual content.

- Product demonstrations
- Technical explainers
- Short-form educational videos

Helps simplify complex concepts and reinforce credibility

### INDUSTRY PLATFORMS / TRADE MEDIA

RELEVANT INDUSTRY WEBSITES, PUBLICATIONS, AND PROFESSIONAL COMMUNITIES.

- Extend reach within niche audiences
- Build credibility through industry context
- Support awareness among targeted professionals

## SUPPORTING CHANNELS

### WEBSITE / LANDING PAGE

- Central hub for product information
- Technical details and specifications
- Primary conversion point for inquiries

### EMAIL & DIRECT COMMUNICATION

- Follow-up with interested prospects
- Share technical documentation
- Support ongoing engagement

### SALES TEAM INTEGRATION

- Direct interaction with qualified leads
- Answer technical questions
- Facilitate conversion and adoption

### INDUSTRY EXPERTS & TECHNICAL KOLS

- Collaborate with engineers, drilling specialists, and industry professionals
- Share product insights, use cases, and technical perspectives
- Build credibility through trusted voices within the industry
- Support adoption by reducing skepticism toward new solutions

## ROLE OF CHANNELS

Social platforms → awareness and engagement
Video platforms → education and explanation
Website → depth and credibility
Email & sales → conversion and relationship building

## IMC ALIGNMENT

All channels deliver a consistent message:
Performance first, sustainability as added value
Ensuring a unified, credible experience across all touchpoints.

# MEDIA & CONTENT PLAN (1-MONTH EXECUTION)

## Day-by-Day Campaign Rollout

| | Day | Channel | Activity | Description |
|---|---|---|---|---|
| **WEEK 1** TEASE (AWARENESS) | Day 1 | LinkedIn | Launch Post 1 (Teaser Video) | Introduce performance vs sustainability tension without |
| | Day 2 | LinkedIn | Community engagement + monitoring | Respond to comments and track early audience reactions |
| | Day 3 | LinkedIn | Launch Post 2 (Risk Angle) | Reinforce operational risk and skepticism toward new |
| | Day 4 | Industry Platforms | Light content distribution | Extend reach within niche industry communities |
| | Day 5 | Website | Prepare product page | Ensure technical content and messaging are aligned for |
| | Day 6–7 | LinkedIn | Engagement + optimization | Monitor performance and adjust visibility if needed |
| **WEEK 2** REVEAL (INTRODUCTION) | Day 8 | LinkedIn | Launch Post 3 (Soft Reveal) | Introduce Lubri-Soy as a solution without aggressive |
| | Day 9 | Website | Product page live | Make detailed product information accessible to interested |
| | Day 10 | LinkedIn | Launch Post 4 (Value Positioning) | Position product as solving the performance vs sustainability |
| | Day 11 | Industry Platforms | Share announcement | Increase visibility through industry-relevant channels |
| | Day 12–13 | LinkedIn | Engagement + feedback tracking | Monitor audience response and interaction quality |
| | Day 14 | Internal | Optimize messaging | Adjust content based on engagement insights |
| **WEEK 3** EDUCATE (CONSIDERATION) | Day 15 | LinkedIn | Launch Post 5 (How It Works) | Explain product mechanism and performance benefits |
| | Day 16 | Video Platforms | Publish explainer/demo | Provide deeper understanding through visual demonstration |
| | Day 17 | LinkedIn | Share video snippet | Drive engagement and redirect to full content |
| | Day 18 | LinkedIn | Launch Post 6 (Sustainability) | Clarify sustainability without compromising performance |
| | Day 19 | KOLs / Experts | Amplify content | Leverage trusted voices to increase credibility |
| | Day 20–21 | LinkedIn | Engage with technical questions | Address audience concerns and reinforce trust |
| **WEEK 4** CONVERT (ACTION) | Day 22 | LinkedIn | Launch Post 7 (Proof) | Reinforce reliability through performance-focused messaging |
| | Day 23 | Website | Highlight proof points | Showcase product performance and real-use relevance |
| | Day 24 | Email | Follow-up with prospects | Re-engage interested users with additional information |
| | Day 25 | LinkedIn | Launch Post 8 (Conversion CTA) | Encourage action with clear product positioning |
| | Day 26–27 | Sales Team | Direct outreach | Connect with qualified leads and answer technical questions |
| | Day 28 | Email | Share documentation | Provide technical details to support decision-making |
| | Day 29–30 | Sales + Website | Support final conversion | Assist inquiries and facilitate final engagement |

# PRIMARY KPI (SUCCESS METRIC)

+25% growth in awareness and qualified B2B inquiries within one month

### AWARENESS METRICS (WEEK 1–2)

Reach and impressions growth
Video views and completion rate
Engagement rate

**Target:** Support a 20–25% increase in brand visibility

### ENGAGEMENT METRICS (WEEK 2–3)

- Click-through rate (CTR) to website
- Time spent on content
- Quality of engagement (comments, discussions)

**Target:** Improve engagement depth and interaction quality by 15–20%

### CONSIDERATION METRICS (WEEK 3–4)

- Website traffic to product page
- Repeat visits and content exploration
- Time on technical pages

Target: Increase product page visits and repeat engagement

### CONVERSION METRICS (WEEK 4)

- Qualified inquiries
- Contact form submissions
- Sales interactions

Target: Achieve +25% increase in qualified leads

**SUCCESS INDICATOR**
Achieve measurable growth in awareness, engagement, and qualified leads, while building confidence in Lubri-Soy as a reliable, high-performance solution.

LFS
CHEMISTRY

# THE END

**THANK YOU**

PARDIS SHIRVANI

MARCH 2026
