t(AI)ste Studio

SEP 2, 2025

Project Name : AI Sofa Visualization
Company Name: Atriani

To help us generate the most accurate and visually refined AI imagery of your sofas, we'd like to gather a few key details:

Image Purpose & Usage:
Where will you use these images (e.g., website, catalog, social, print)?

Image Specifications :
What size/resolution and file format do you need (JPG, PNG, etc.)?

Style & Benchmarks:
Do you have reference images/benchmarks, or should we match your current website style?

Environment & Context:
Should sofas be shown in real interiors (any photos of your spaces?) or on plain backgrounds?

Sofa Variations:
Which sofa models, and should we show them in multiple colors/materials or just one?

Camera Perspective:
What camera angles do you prefer (wide, close-up, lifestyle, multiple views)?

Additional Notes
Any props, decor, or mood you'd like included, and should all images have a consistent style or varied settings?
